

# Storage, Technology and Information— All Within Reach:

- > Provides access to the most up-to-date data.
- > Allows nurses to update records in real time.
- > Provides needed storage to support treatment.
- > Reduces number of trips looking for supplies.
- > Eliminates the need to carry or push a secondary device.

STARSYS® Unlimited Modularity. Ultimate Choices.

## POWER & PERFORMANCE RIGHT AT HAND.

When you think about space, you may think about efficiency.  
Or better organization. Maybe the freedom to be flexible.

**Complete Storage System-** Addresses applications facility- wide.

**Interchangeable Components-** Provides flexibility to address changing needs.

**Modular Design-** Provides flexibility to change layout and/or location.

**Highly Configurable-** Design on wheels, with countertops, even on the walls.

**Polymer Construction-** Maintains function and aesthetic over time.

# Most advanced power system.

## METRO POWERPOD™

Computerized carts are equipped with Metro's PowerPod, featuring a universal power supply that accommodates a long running LiFe battery solution that provides a lower cost of ownership. PowerPod is an AC/ "Plug-& Play" solution designed to get the clinician and tools they need—where they are needed...Next to the patient.

<b>Battery Chemistry</b>	<b>LiFe</b> <i>Lithium Iron Phosphate</i>
<i>Battery Capacity</i>	576 Wh
<i>Available Power*</i>	490 Wh
<i>Run Time @ 35 Watts</i>	14 hours
<i>Battery Life (@ 60%)</i>	3,000+ cycles
<b>Power Supply</b>	<i>Universal</i>
<i>Recharge Time (max.)</i>	2.5 hours
<i>Charging Status Indicator</i>	<i>Continuous readout on control unit display</i>
<i>Input Voltage</i>	100-240 VAC, 5.4-2.1 A, 50 Hz / 60 Hz
<i>Output Voltage</i>	120 VAC, 60 Hz
<i>Maximum Power Draw</i>	150 W
<i>Regulatory</i>	UL 1778, CSA C22.2 No. 107.3-05; CAN/CSA-22.2 No. 60601-1-08; ANSI/AMMI ES60601-1:2005; Complies with NFPA 99; Marks: CE, FCC and EAC

\* Power to device after converting DC battery power to AC and accounting for depth of discharge protection.

## STARSYS® Unlimited Modularity. Ultimate Choices.

### FEATURES

1. Small footprint for easy maneuverability.
2. Provides you with the ultimate in modularity and highly customizable designs.
3. Highly configurable supply or medication storage options with wide variety of sizes to aid in treatment at the point of care.

### Why use an Articulating Arm Mount?

(Available on Starsys & Flexline)

- > Effortless height adjustability.
- > Easy maneuverability of the computer screen to be closer to the patient.
- > Ability to secure the arm in place for mobile applications
- > Flexline or Starsys can be equipped with an arm for a monitor, all-in-one computer, or laptop, or equipped with an overbridge for monitor mount and supply storage.

### Applications implementing these solutions:

(Available on Starsys & Flexline)

- > Traveling Anesthesia Carts
- > Oncology IV Treatment Carts
- > Emergency Dept. Overflow Carts
- > Bedside Carts
- > Procedure Carts

## FLEXLINE® Flexible options. Designed around you.

### FEATURES

1. Increased storage capacity with spacious worksurface and larger drawers.
2. Internal battery cord and cable management system to keep the cords and cables from being exposed to the hospitals elements.
3. Large full-extension, ball-bearing drawers are self closing to ensure drawers are secure.

PROTECTION THAT LIVES ON  
**MICROBAN®**

# More options to boost efficiency.

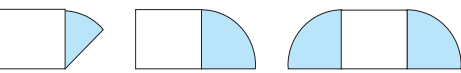

Cart is ready for an approved all-in-one computer, laptop or small form factor computer for plug and play integration.

Pull out keyboard shelf allows for a separate storage area for your keyboard below the carts work surface.

Power source located on the bottom of the cart for optimization of storage space without adding to the cart's footprint.

Highly visible location displaying power status and remaining runtime.

135% more space.

Opening both side storage units more than doubles the work surface.  
(Available on Starsys only)

Drawer dividers are critical to maintaining an organized storage space.  
(Available on Starsys and Flexline)

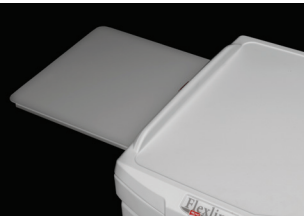

Optional antimicrobial keyboard to keep it cleaner between cleanings  
(Available on Starsys and Flexline)

Side storage units offer a variety of accessory options.  
(Available on Starsys and Flexline)

Easy-exchange, easy-clean drawer totes drop into drawer frames.  
(Available on Starsys only)

Slide-out side shelf allows for additional workspace but can be retracted when not in use keeping a small footprint.  
(Available on Starsys and Flexline)

Additional storage above the computer available with overbridge option.  
(Available on Starsys and Flexline)

Optional electronic locking unlocks the cart without a key. Proximity card reader options are also available.  
(Available on Starsys and Flexline)

Translucent tilt-out side bins add visible storage with optional locking to keep contents secure.  
(Available on Starsys and Flexline)

Starsys and Flexline are constructed of advanced polymers, designed with rounded corners and infused with Microban® antimicrobial product protection for a clean, durable solution that withstands the rigors of a healthcare environment.
