Flexline Touchpad Basic

Certain applications have a basic need to keep supplies secure and carrying a key is simply not convenient. The Flexline basic touchpad provides a simple solution that allows authorized entry via a 4 digit user identification number or the option to scan an authorized employee badge. The touchpad is battery operated, so there is no need to have dedicated outlets, and it is backed up with a mechanical key lock should the need arise.

Features Include:

- 250 unique User/Administrator identification numbers
- Auto-Relock timer - default 5 minutes, adjustable via software from 1 second to 18 hours or can be disabled
- Available Access Denied lockout timer – disables touchpad for a set time after repeated unauthorized entry attempts, programmable via software (feature is disabled as factory default, programmable 1 to 99 minutes)
- Battery operated on six replaceable D-Cell batteries
- Expected minimum battery life of one year
- Cart audit memory retains last 1,500 access events

Optional proximity card access:

- Exclusive Facility Code Access – eliminates the need to set up and manage all individual user cards
- Low (125 kHz) or High-Frequency (13.56 MHz) integrated card readers
- Individual Card Code Access – control access to authorized group of users

Optional software management:

- LockView® 5Pro software includes license for 1 server and 1 client
- USB connection from facility's computer to cart
- Facilitates faster fleet updates of user adds/deletes and audit trail info
- Required for Auto-Relock and Access Denied timer adjustments and audit trail capture

Basic Touchpad

Catalog Number	Description
FLX412 ^F	Flexline Basic Keyless Entry Touchpad
FLX423	Lock Management Software, Lockview 5Pro , w/1 client and 1 server license
FLX424	Lock Management Software, Basic, or additional license for FLX423

Flexline Touchpad Basic

LockView® 5Pro software specification for Flexline Basic Touchpad

Lockview software is intended to be installed on a facility's computer that is capable being mobile to allow connection via USB to an individual cart.

Minimum System Requirements:

- Windows Vista, 7, 8, 8.1, 10, Server 2008/2012 and R2 versions
- 4GB RAM - Processor 2.0 GHz or higher (8GB RAM recommended)
- 4GB Hard drive space
- SQL Server Standard, Enterprise, or SQL Express 2008/2012/2014 and R2 versions (optional, see note)
- ODBC connection required to Server (optional, see note)
- Local Administrator Rights are required to install and register the software
- .Net 4.0 Client Framework
- Minimum monitor resolution: 1024 x 768
- Signed 32 bit and 64 bit WHQL drivers
- Supports both 32 and 64 bit Operating Systems
- Compatible with VMWare

Note: LockView will create a local MS Access database, which will be sufficient for standalone usage. If multiple clients are logging into the database, an SQL Server is recommended to ensure database integrity.

Software Features:

- Includes USB connection cable
- Manages a database of authorized users and supervisors including user name, user's ID #, and user's access card number
- Manages database of supported carts and their settings
- Programmable access denied lockout feature
- Programmable auto-lock timer
- Maintains a comprehensive audit trail of cart access attempts
- eReports can be setup to automatically create and send audit trail reports to a list of email addresses daily, weekly or monthly
- Time based restrictions for access control, individual or group
- Option to require two different credentials to gain access – i.e. card and ID number
- Alarm volume adjustment settings

Software Benefits:

- Provides more efficient management of users and cart settings from a single source
- Eliminates the redundant task of re-entering users and cart settings via the touchpad on each cart
- Visibility to cart access can provide a higher level of security and minimize diversion
- Provides consistency in authorized users
- Standardizes settings across a fleet of carts
