SUPER ERECTA SHELF® CRADLE WINE SHELVING*

- **Safe Storage of Wines:** Each bottle is supported individually in a cradle formed by the wires of the shelf, so it cannot roll or bump against adjacent bottles. The top of the wire “snake” acts as a natural back stop when placing bottles on the shelf.
- **High Visibility:** Open wire construction keeps bottles and labels highly visible for easy reading and selection. Units stay clean longer, because there is less surface area where dust can accumulate.
- **Permits Proper Air Flow:** Open wire permits air to circulate freely around the bottles, which is critical in maintaining the proper temperature in a wine cellar or other environmentally controlled room.
- **Easy Access:** Open wire design, with shelves spaced 5" (127mm) apart, provides easy access to bottles for loading or removal.
- **Large Capacity:** Cradle wine shelving is available in four standard units, all 14" (355mm) wide:
 - 36" (910mm) long x 74³/₄" (1899mm) high
 - 36" (910mm) long x 86³/₄" (2203mm) high
 - 48" (1220mm) long x 74³/₄" (1899mm) high
 - 48" (1220mm) long x 86³/₄" (2203mm) high36" (910mm) long shelves hold nine 750ml bottles;
48" (1220mm) long shelves hold twelve 750ml bottles.
74³/₄" (1899mm) high units have 14 shelves;
86³/₄" (2203mm) high units have 17 shelves.
- **Stable:** All posts are fitted with triangular foot plates which bolt the units to the floor for greater stability. In addition, two wall clamps are provided with each unit, which hook under the top shelf and can be secured with fasteners suitable to the wall.
- **Quick, Secure Assembly:** Super Erecta Shelf® construction means assembly is fast and simple, with no special tools needed. Patented split sleeve device assures a strong, secure fitting.
- **Chrome-Plated Finish:** Attractive and clean.
